MRC du Golfe-du-Saint-Laurent

Highlights

Council Meeting

October 2026

Administration

Changes to the Public Safety Committee's Priorities

The MRC Council has amended the priorities of the Public Safety Committee, which were adopted last March. This committee is composed of members of the Council of Mayors and the sergeant from the MRC's Sûreté du Québec station. Under the priority "Community Policing," the police officers will return to a prevention-based approach in communities not connected by Route 138 and will continue to enforce the Highway Safety Code in communities connected by Route 138. This clarification allows police interventions to be adapted to the road access situation in each community.

Sale of Properties Due to Non-payment of Taxes

Under the Municipal Code of Quebec, the MRC is responsible for selling, on behalf of the municipalities within its territory, properties for which property taxes remain unpaid. This is a measure used as a last resort and at the request of the municipalities. The MRC has adopted the bylaws governing this process: Bylaw 26, which sets the sale date, and Bylaw 27, which sets the fees and charges levied by the MRC. Citizens are encouraged to contact their municipality with any questions.

Administration (cont.)

Provincial Elections

The MRC would like to congratulate Ms. Meggie Richard on her election as the Member of the National Assembly for Duplessis and her appointment as Minister responsible for Regions and Land Occupancy and Minister responsible for the North Shore region. We look forward to working with her and the other members of the Cabinet to defend the interests of the Lower North Shore.

Economic Development

The MRC has provided support for three projects under the territorial development agreement of the Regional and Rurality Fund (FRR).

The projects represent investments totaling $69,233.46, half of which is funded by Component 2 of the FRR. The funding will support the upgrading of a fishing vessel ($2,640), the modernization of a company's IT and network infrastructure ($5,223.45), and the purchase of a bait freezer ($26,753.28).
